### Report of the events organized

Organizing Department	Department of BCA
Name of the event	Wall paper
Title of the programme	Inauguration of wall paper
Date & Day	23-August-2024 & Friday
Name of Co-ordinator	Mrs. V.Y.Gadhave
Class of participant	All BCA student
No. of Participants (Students & Staff)	Student - 13, Staff - 2
Name of expert/ Guide/Guest Contact No.	Dr.Pratibha P.Patne
Objective of event	For the student to gain the technical knowledge.
Outcome of event	Students enhance there presenting skill.

Topic: Communication Skills

Page: \_\_\_\_\_

Date: 27/08/2024

\* Concept:

The English word "communication" has been derived from the Latin word "communicatio" which is derived from the root "communis" which means to make common or to share.

\* Communication:

i) The activity or process of sharing or exchanging ideas, feelings, information, exchanging experience between two or more persons

ii) The information actually communicated by some means

\* Definition

"Communication is the process of passing information & understanding from one person to another"

\* Process of communication:

i) An idea arises in the mind of the sender which is sent to the receiver.

ii) The sender encodes the idea in the form of a message.

## Topic: Control Statements

Page: \_\_\_\_\_

Date: \_\_\_\_\_

\* Control statement :- There are two types of Control statements. i) Decision Making statement or Conditional statement.

ii) Looping statement or Control Statement.

i) Decision Making statement :- When a program breaks the sequential flow and jumps to another part of the code it is called Branching statement. When the branching is based on a particular condition, it is known as Conditional branching is based. Decision making statement are of a following types :-

- 1) simple if statements
- 2) if-else statements
- 3) Nested if-else statement
- 4) else if ladders
- 5) conditional operator statement
- 6) switch case statement.

ii) Looping statements :- Every computer language must have features that instruct a computer to perform a repetitive task, and the process of repeatedly executing a block of statements is known as looping.

In looping sequence of statements are executed until same conditions for the termination of the loop are satisfied.

A control statement test certain conditions and then directs the repeated execution of statement.

'C' provides the three construct for program perform loop operations type are :- i) The while statement.

ii) The for statement

iii) do-while statement.

## \* History of Computer \*

I. The term of 'Computer' was first introduced in '1640' & referred to as a 'one who calculates'. It was derived from the Latin word Computer which means 'to calculate'.

II. When the Computer were introduced they were large & could fill an entire room. Some Computer were operated using large size vacuum tube.

III. In 1833 Charles Babbage known as the (father of computer) invented an early calculator which was named as difference engine. Later in 1837 he introduced the first mechanical general purpose computer, Analytical engine.
